

Checklist ST EOL Test System/STM Relay Matrix/ST-EOL Software

Customer:

Contact:

Order number:

ST product type: STM EOL SW System

Requested delivery date:

Outline specifications:

(Test sequence, required standards, description of DUT, no. of tests per hour, test protocol, example, ...)

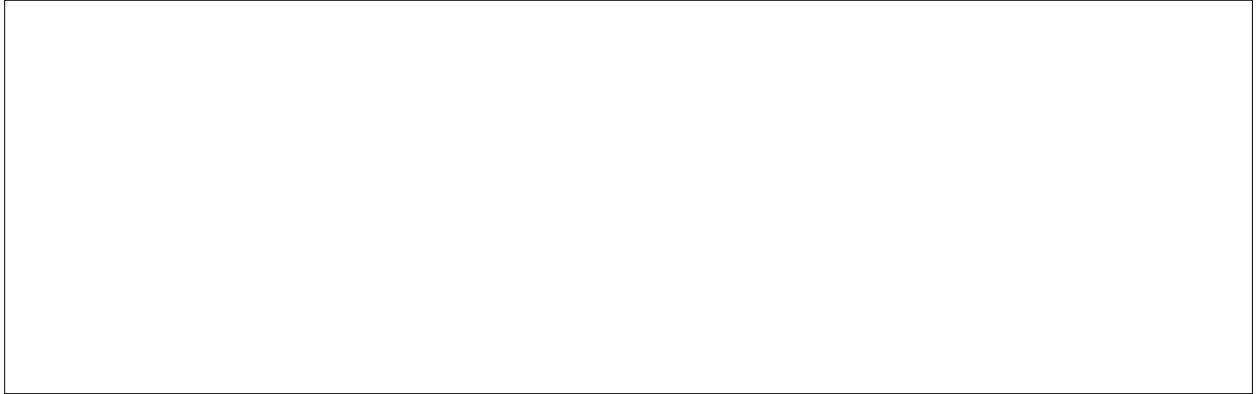

Test station design:

(manual/automated, connection of DUT, wiring, PC, monitor, label printer, bar code scanner, ...)

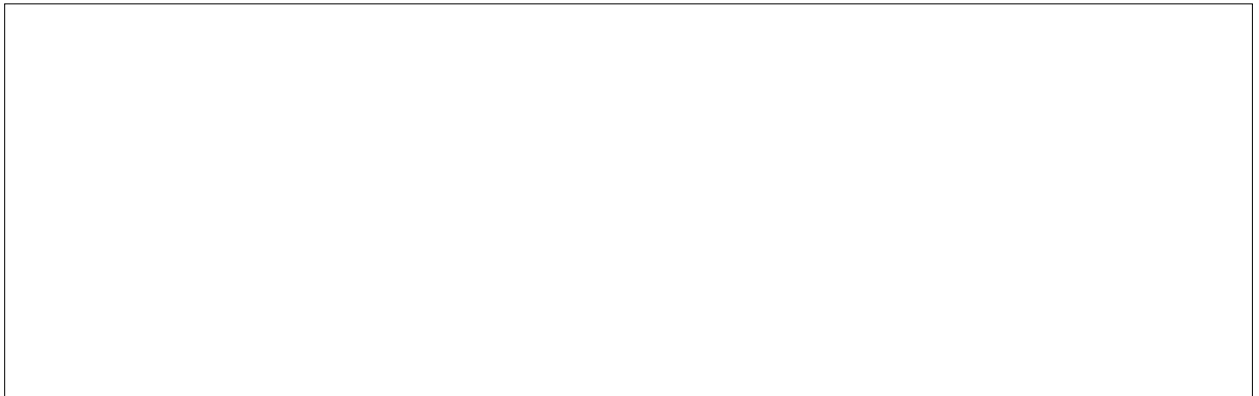

Workplace Safety:

(Performance Level, test cage interlocking device, safety current limit, residual voltage detection, discharge circuit, ...)

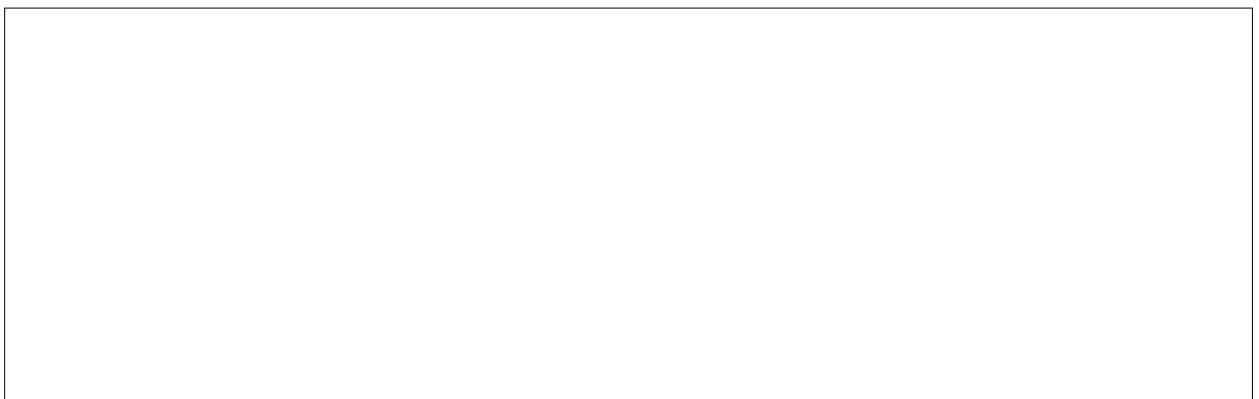

Software:

(Special requests, device types, functions, database connection, external trigger, protocol printer, ...)

Additional remarks:

Equipment provided by customer:

- Examples of good/bad DUTs
- [CFE](#) Measurement device to be integrated into EOL software
- Label printer
- Sample test protocol
- PC and, if applicable, (touch) monitor
